Experience in work with doctoral students (defended doctoral dissertations, doctoral programmes opened) in chronological order	defended: 2019 Kowalczyk Sławomir; 2015 Nowicka Dorota, 2013 Czopowicz Michał open: 2018 Maria Milczarek
Project/grants achievements (from the last 10 years)	<p>Multivariable biostatistical model based on in vitro methods for prediction of anthelmintic resistance in goats, NCN, 2021-2024, principal investigator</p> <p>Development of a rapid screening test for on-site serological diagnostics of caprine arthritis-encephalitis using individual milk samples, ICRAD, Horizon 2020, 2021-2024, member of the management committee</p> <p>Immunological response in the course of natural infection with small ruminant lentiviruses, NCN, 2014-2018, principal investigator</p>
Topic – research problem – for which the candidate supervisor seeks a doctoral student	The use of laboratory diagnostic methods (ELISA, PCR, pyrosequencing, Luminex xMAP) in epidemiological studies in the goat population in Poland. The work will consist in developing new diagnostic tests and assessing their suitability for carrying out epidemiological studies in a large population of animals.
