Experience in work with doctoral students (defended doctoral dissertations, initiated doctoral procedures) in chronological order	<p>Assistant Promoter – MSc. Elżbieta Dąbrowska PhD in progress, planned defense in 2025.</p> <p>Assistant Promoter – MSc. Adam Nawrocki - PhD in progress, planned defense in 2026.</p> <p>Assistant Promoter – MSc. Zuzanna Zajac - PhD in progress, planned defense in 2028.</p>
Achievements in the area of projects/grants (in the last 5 years)	1. Coordinator of the project titled "Phytoremediation of microplastic particulate dust and heavy metals and their impact on vegetation and insects" – within the Sonata 16 NCN program: 07.2021–07.2025.
Subject area of the research project for which the candidate student is being recruited	The thematic scope concerns air phytoremediation, particularly the impact of suspended dust on the condition of plants and their ability to accumulate PM, microplastics, heavy metals, and organic compounds. The research topic also includes the impact of green infrastructure elements on environment in urban areas.
