Didactic form, number of hours:	Auditorium exercises, 10
Teaching methods:	Discussion, case study, analysis of scientific articles, application of quantitative methods
Limit of people in the group:	

Learning outcomes		
KNOWLEDGE - the graduate knows and understands:	SKILLS - the graduate is able to:	COMPETENCES - the graduate is ready to:
To the extent enabling to revise the existing pradigms in the field/discipline - the world achievements, gathering theoretical background as well as general and selected detailed issues	Carry out critical assessment of the scientific research findings and expert activities and their contribution to the knowledge development in the field/discipline	Critically evaluate the achievements in the field/discipline represented
Major general development trends in the field/discipline		Recognise knowledge in solving cognitive and practical problems characteristic for the area of research (field/discipline) and in an interdisciplinary aspect
		Support the ethos of scientific circles and conduct independent research
The method of verification of learning outcomes:	Exam; assessment of activity during classes	
Form of documentation of achieved learning outcomes:	Exam report, list of students	
Elements and weights of the final grade:	Exam – 90%, activity assessment – 10%	
Place of the course:	Classroom
